

# IMPORTANT

**According to federal law,  
all lithium and lithium ion batteries  
MUST be individually bagged or be taped  
at the ends before disposal to prevent  
battery-related fires.**

**PLEASE HELP US COMPLY BY TAPING  
THE CONTACTS OR INDIVIDUALLY  
BAGGING YOUR LITHIUM OR  
LITHIUM ION BATTERIES**

## Lithium (Primary) Batteries:

- Small, dry-cell batteries, sealed and non-rechargeable.
- Button cell, AA, AAA, 9-volt, small cylinder, custom sizes
- Commonly used in watches, cameras, handheld electronics, tire-pressure sensors, alarms, memory backup, pacemakers, remote car locks

## Lithium Ion Batteries:

- Small, dry-cell batteries, sealed and rechargeable
- Custom sizes in hard plastic case, small cylinder, button cells
- Commonly used in cell phones, laptop computers, power tools, hybrid automobiles, video cameras, handheld electronics
